Hang Yu

hyu08@tufts.edu HangYu8123.github.io hang-yu-0343b2273 7818279626 Somerville, MA

Overview

My current research focuses on **Human-Centered AI** in **Robotics**, specifically, on learning from multi-modular teachings, including human feedback **(RLHF)**, demonstrations **(LfD)**, and generative methods**(GAN, VLM, VLA)**. Before that, I worked on Recommendation Systems for three years and competitive programming for seven years.

Skills

Robotic Skills: ROS, ROS2, Gazebo, Isaac Sim, Gello, UMI, VLM/VLA, LfD, Imitation Learning, Sim2Real
Robotic Hardwares: Kinova Gen2/Gen3/Gen3-lite,ABB IRB 1300, Fetch, UR3E, UR5, Misty II, Cozmo
Machine Learning Skills: RL, Inverse RL, RLHF, RecSys, MCP, LLM/VLM Fine-Tuning, VLA Post-Training

Education

Tufts University Medford, MA
Ph.D. in Computer Science, GPA: 4.0/4.0 June 2026(expected)
Advisor: Dr. Elaine Schaertl Short

Tufts University Medford, MA
M.S.E. in Computer Science, GPA: 3.95/4.0 Jan. 2021
Advisor: Dr. Elaine Schaertl Short

Research/Work Experience

Research Scientist Intern, Berkshire Grey Jan 2026 – Present
Working on robot learning and developing VLA for bimanipulation robotic arms.
Building Gello and UMI pipeline for collecting data for VLA training and fine-tuning.

Research Assistant, Assistive Agent Behavior and Learning Lab, Tufts University 2020 – present
Conduct research on robot learning and human-in-the-loop learning.
Robot learning from non-expert users with data collected in real-world scenarios in public spaces.

Research Assistant, Lanqiao Lab, Yantai University 2016 – 2019
Conduct research on contextual preference mining for recommendation systems.

Projects

A World Model Powered VLA with Hierarchical Self-Attention for Manipulation
Integrating Hierarchical Self-Attention into GigaBrain-0 to achieve better grasping and object manipulation.
Github: `https://github.com/HangYu8123/gigabrain_with_Hierarchical_Self_Attention`

Single Cell Aging Prediction with Large Language Models Using LoRA
A set of Fine-tuned QWEN3 32B model with **customized vocab** for predicting the age of single cells.
Github: `https://github.com/HangYu8123/SC_Ageing_Prediction.git`
Hugging Face: `https://huggingface.co/Ha-ya/QWEN3-32B-EXTENDED-BLADDER-V1`

Instructions for Agentic Coding Workflow
Instructions for agentic coding workflow, including: coding, debugging, refactoring, and maintaining update logs
Github: `https://github.com/HangYu8123/agentic_coding_instructions.git`

PHIRL: Progress-Heuristicized Inverse Reinforcement Learning
An IRL learning framework that learns from human feedback, human demonstrations, and VLMs.
Github: `https://github.com/HangYu8123/PHIRL-Progress-Heuristic-for-Inverse-Reinforcement-Learning`

Honors/Awards

ICRA Doctoral Consortium 2025
Selected to participate in the ICRA Doctoral Consortium.

RO-MAN Student Grant 2024
Selected as the winner of the travel grant of RO-MAN 2024.

Lanqiao Programming Competition National First Prize 2016
Awarded to participants who were **Top 0.5%** among all the participants.

Selected Professional Service

Mentor
Isabella Bock, Undergraduate Student, Summer Intern, now at Tufts University
Matthew Ebisu, Master's Student, Co-author of C3, now at MassRobotics
Shijie Fang, Master's Student, Co-author of C4, C1, C2, now at Dongnan University

Teaching Assistant
Ethics for AI, Robotics, and Human-Robot Interaction, Tufts University — Spring 2024, Spring 2025
Human-Robot Interaction, Tufts University — Fall 2022

Selected Service
ICRA Undergraduate Research Panelist — 2025
Keynote Presenter at First Robotics Competition Conference NE — 2024
DIAMOND Program Panelist — 2023
Tufts Computer Science Student Council — 2023 – Present
Program Committee for AAMAS — 2026
Reviewer for International Conference on Human-Robot Interaction (HRI) — 2021, 2022, 2023, 2024
Reviewer for International Conference on Robotics and Automation (ICRA) — 2023, 2024, 2025
